

DV- Aluminum

DESCRIPTION:

Injection grille available in aluminum. Double deflection, with individually adjustable aerodynamic vanes, vertical front and horizontal on the back with a 3/4" between track centers, providing a maximum flexibility in the air pattern.

MATERIALS:

Our aluminum profiles are made with hardness for a higher resistance, manufactured with the same design in plastic. Tempered galvanized steel wire is used in the vanes axis to avoid noise and vibration.

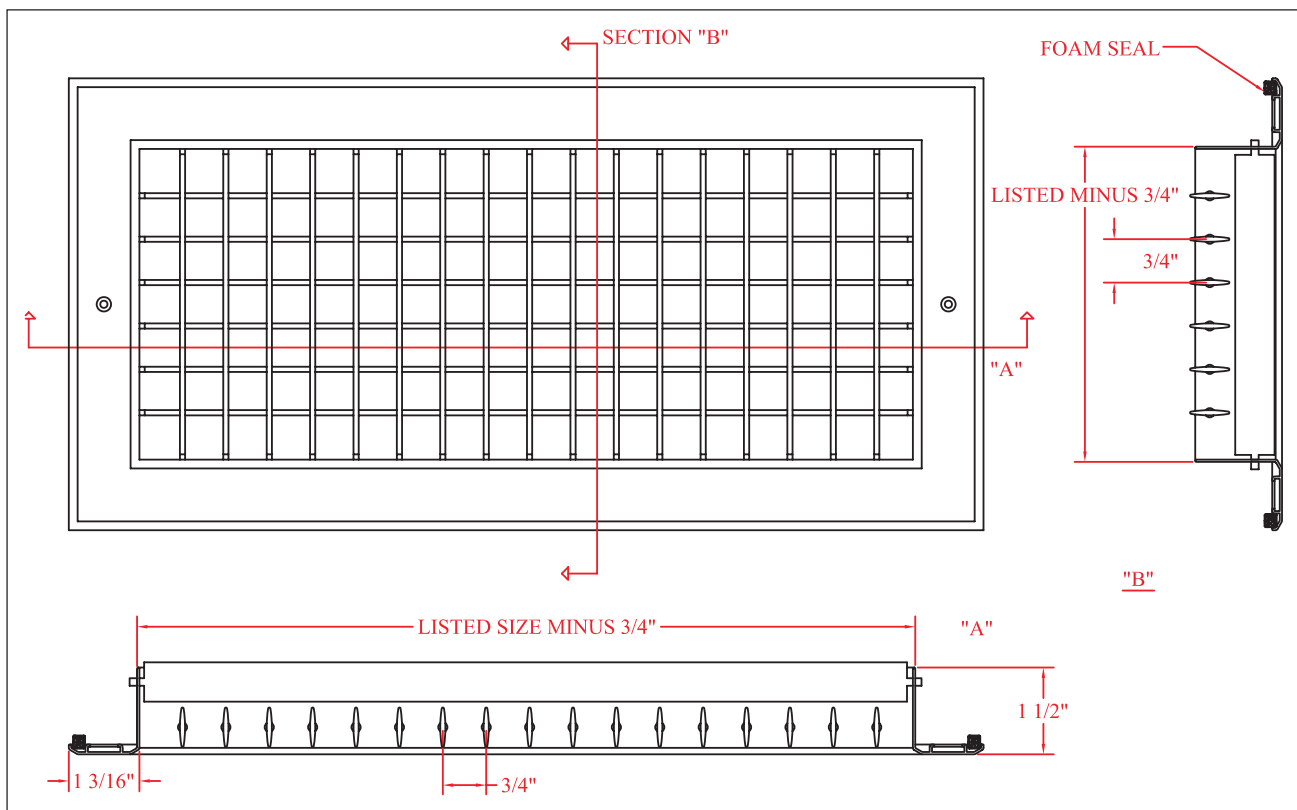

FINISH:

Electrostatic baked paint (polyester) in Vermont white as standard finish, also available in gray aluminium and matte black without an extra cost. Foam seal in the frame to prevent dust stains, airtight plastic packaging with screws for set adjusting.

Note:

*In measurements 20" or higher a crossbar is added to conserve the necessary quality and rigidity.

*Volume control of opposite blades (C or D) can be added to this model.
